Tomcat

- Aller sur http://tomcat.apache.org/ pour télécharger Tomcat
- Décompresser le fichier et créer les deux variables d'environnement
 - CATALINA_HOME = chemin vers dossier Tomcat
 - JAVA_HOME = chamin vers dossier jdk ou jre
- Lancer Tomcat : Tomcat\bin\startup.bat
- Consulter: http://localhost:8080/

Axis

- Aller sur http://axis.apache.org/axis/ pour télécharger Axis
- Décompresser le fichier
- copier l'application Web d'Axis (webapps/axis) dans le répertoire d'applications Web de Tomcat (Repertoire Tomcat/webapps/)
- Consulter: http://localhost:8080/axis/

Axis

Apache-AXIS

Hello! Welcome to Apache-Axis.

What do you want to do today?

- <u>Validation</u> Validate the local installation's configuration see below if this does not work.
- · List View the list of deployed Web services
- Call Call a local endpoint that list's the caller's http headers (or see its WSDL).
- Visit Visit the Apache-Axis Home Page
- Administer Axis [disabled by default for security reasons]
- SOAPMonitor [disabled by default for security reasons]

To enable the disabled features, uncomment the appropriate declarations in WEB-INF/web.xml in the webapplication and restart it.

Axis

 Tester la configuration avec Validation: http://localhost:8080/axis/happyaxis.jsp

Axis Happiness Page

Examining webapp configuration

Needed Components

- · Found SAAJ API (javax.xml.soap.SOAPMessage) at an unknown location
- Found JAX-RPC API (javax.xml.rpc.Service) at C:\ws\apache-tomcat-7.0.67\webapps\axis\WE.

Création du service

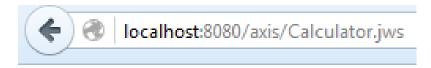

Code du service Calculator

```
public class Calculator {
  public int add(int p1, int p2) {
    return p1 + p2;
  }
  public int substract(int p1, int p2) {
    return p1 - p2;
    }
}
```

Déploiement du service

- Enregister le code sou Calculator.jws.
- Placer ce fichier dans le répertoire webapps\axis de Tomcat.
- Le fichier WSDL est généré à la volée par AXIS.
 On peut le consulter sur :

http://localhost:8080/axis/Calculator.jws

There is a Web Service here

Click to see the WSDL

Déploiement du service

Fichier WSDL

```
- <wsdl:definitions targetNamespace="http://localhost:8080/axis/Calculator.jws">
  -<wsdl:message name="addRequest">
      <wsdl:part name="p1" type="xsd:int"/>
      <wsdl:part name="p2" type="xsd:int"/>
   </wsdl:message>
  -<wsdl:message name="substractRequest">
      <wsdl:part name="p1" type="xsd:int"/>
      <wsdl:part name="p2" type="xsd:int"/>
   </wsdl:message>
  -<wsdl:message name="addResponse">
      <wsdl:part name="addReturn" type="xsd:int"/>
   </wsdl:message>
```

Création d'un client

• Ce client invoquera les méthodes du service via la classe principale **Call**.

```
import org.apache.axis.client.Call;
import org.apache.axis.client.Service;
import org.apache.axis.encoding.XMLType;
import org.apache.axis.utils.Options;
import javax.xml.rpc.ParameterMode;
```

Création d'un client

Code du client CalcClient

```
String endpoint = "http://localhost:8080/axis/Calculator.jws";

String method = args[0];

Integer i1 = new Integer(args[1]);
Integer i2 = new Integer(args[2]);
```

Création d'un client

Code du client CalcClient

```
Service service = new Service();
Call call = (Call) service.createCall();
call.setTargetEndpointAddress(new java.net.URL(endpoint));
call.setOperationName( method );
call.addParameter("op1", XMLType.XSD INT, ParameterMode.IN);
call.addParameter("op2", XMLType.XSD INT, ParameterMode.IN);
call.setReturnType(XMLType.XSD INT);
Integer ret = (Integer) call.invoke( new Object [] { i1, i2 });
System.out.println("Got result : " + ret);
```

Test du client

```
    Classpath: (variable d'env AXISCLASSPATH)

set AXISCLASSPATH=
.;axis-1 4\lib\axis.jar;
axis-1 4\lib\axis-ant.jar;
axis-1 4\lib\commons-discovery-0.2.jar;
axis-1 4\lib\commons-logging-1.0.4.jar;
axis-1 4\lib\jaxrpc.jar;
axis-1 4 \leq \sqrt{1.2.8.jar}
axis-1 4\lib\saaj.jar;
axis-1 4\lib\wsdl4j-1.5.1.jar
```

Test du client

Compiler :

javac -cp %AXISCLASSPATH% CalcClient.java

• Exécuter :

java -cp %AXISCLASSPATH% CalcClient add 1 2

```
Got result : 3
```

java -cp %AXISCLASSPATH% CalcClient substract 4 2

```
Got result : 2
```
